

...perfect for public play spaces

Inspiring playworlds
for the public area!

Inspiring playworlds for the public area!

Proved to be good for generations and preserved for you: playground-classics for all!

Completely revised - modular - flexible and versatile!

This clear concept is designed especially for public playgrounds in rural areas.

ecorino convinces through a solid manufacture, -modern design and inexpensive materials.

The modular playground concept offers you:

- Play-,climb-,slide-,sand combination
- Swinging, seesawing
- Themed play units

Supplemented by basis-products:

- Water play units and
- Playground equipment

eibe ecorino - and everything fits!

With this multifaceted and yet low-cost concept you will meet all play needs. Durable products keep the maintenance requirements and running cost on the playground low.

new system & new colour worlds 2017

Checked, tested and awarded!

These awards and test seals are the best evidence that we have the quality and philosophy in place.

...perfect for public play spaces

Classic features with contemporary look!

A real highlight for your playground, kindergarten, and school yard!

Your benefits at a glance:

- suitable for playgrounds, GS certified (DIN EN1176)
- highest safety and quality standards
- also ideal for use in non-supervised play areas
- promotes the development of coordination and motor skills in children
- vandalism-proof (if equipped with vandalism-proof jumping sheet)
- easy transport and installation, with instruction video
- 100% made in Germany for more than 50 years
- different sizes, shapes, and versions
- perfect for combination of several trampolines
- attractive price

The jumping sheet is highly vandalism-proof owing to the wire reinforced sides and centre of the fabric. Particularly suitable for non-supervised play areas.

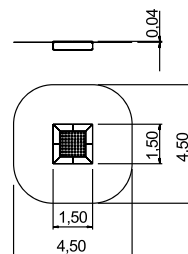

Floor trampoline, Vandalism-proof

Material: Jump mat: wire-reinforced belt material, steel springs, rubber granulate

Impact-attenuating tile glue

Impact attenuation plate glue ensures a lasting and secure attachment to concrete and asphalt surfaces.

5 63 033 0 PUR-adhesive

Safe in free fall

Proven quality

more than 40 years experience worldwide

environment friendly manufacture

maximum safety and long life due to homogenous and constant flexible structure of the fall protection panels pre-assembled connectors are used to secure the EUROFLEX® fall protection tiles against slipping and removal

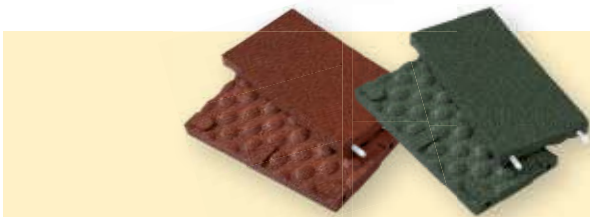

excellent drainage due to the dome shaped underside

quick to install therefore low maintenance costs, permanent playability due to good permeability of the materials therefore cost effective

easy to trim allowing ideal fit around posts and supports

green

Half-tile safety slabs

25 x 50 cm

Standard safety slabs

50 x 50 cm

The professional transition between the surface and the impact-protection covering. Suitable for wheelchairs.

Edge impact attenuation tiles

100x25 cm

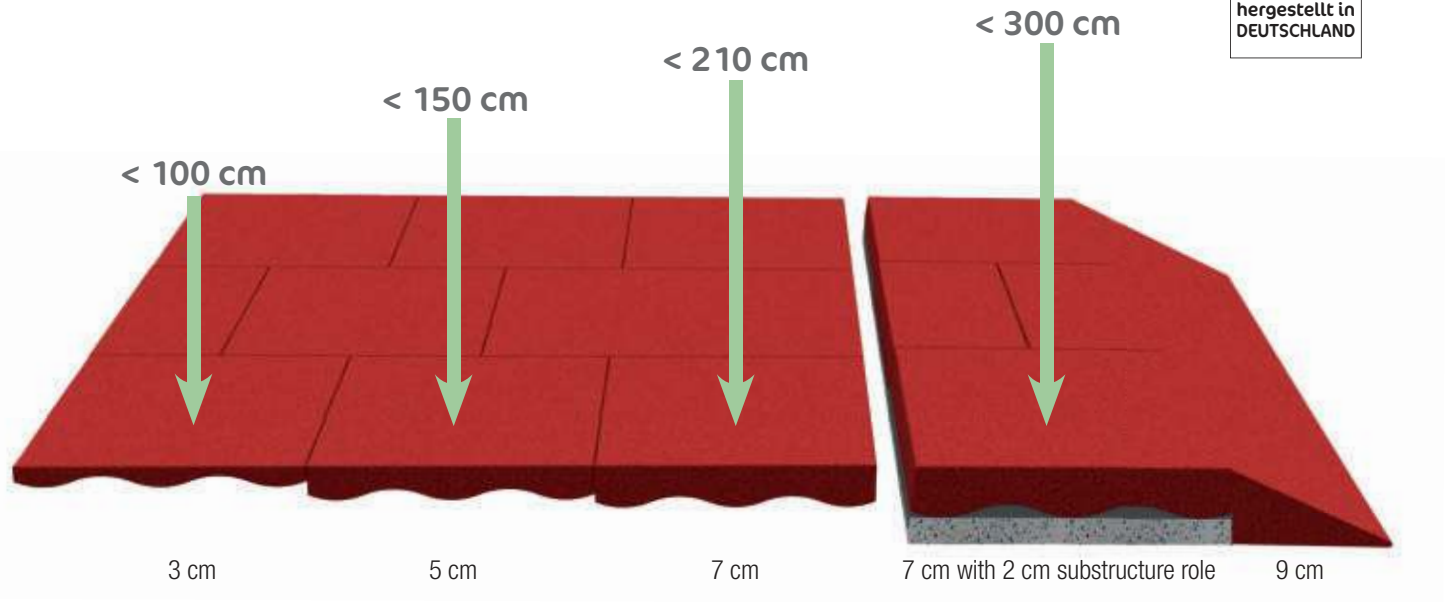

The professional crossover from the surface to the impact attenuation plates reduces the danger of tripping and allows wheelchairs to pass safely.

Corner edge impact attenuation tiles

100x25 cm

Impact protection for free falling heights 100 cm, 175 cm, 210 cm or 300 cm

Tile thicknesses for respective falling heights

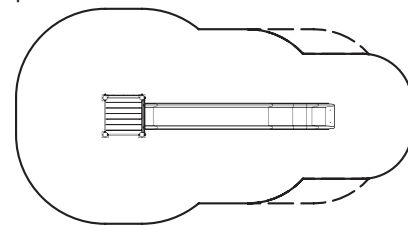

Layout of substructure

1. Compact the underground
2. Base layer, depending on situation on site, approx. 15 cm gravel
3. Setting bed, approx. 3 cm chippings
4. Impact attenuation tiles
5. Borders
6. Connection at ground level

Impact zone

Overview on the required shock attenuation in the impact zone pursuant to DIN EN-1176-1.
